

Current Planning

Some of the hot topics for the new plan are:

- Expanded ATV use
- Even-aged management
- Permitted use of roads
- Dam maintenance
- Data needs
- Emerging forest health issues
- Boat storage on property
- Other lands annexed to Nash Stream
- Northern Pass
- Wind technology
- Climate change
- Invasive species
- Cohoes Trail

We reviewed the “Vision” of the Forest Plan and made some updates to be clearer in our intent.

The intent is to have a completed plan in a year.

The next meeting will be either March 12 or 13 to talk about specific resource areas and what we want the vision to be into the next 15 years.
