Subject RE: Lebanon #13558A Bridge #062/117 bridge replacement of NH rte. 12A over the Northern NH Railroad, 3-24-2020

4/3/20, 08:16

To Corliss, Chuck A <Charles.Corliss2@dot.nh.gov> ☆

This revised list includes bridges with "trail" below. They are not all rail corridor trails, so user beware. The three others you mentioned are not included in the list.

Regards,

Nick

Nick,

The width underneath is something they don't record on most Roads over RR's?

Chuck Corliss P.E.

Railroad Operations Engineer

Chuck,

Please review the attached file and see if it meets your needs. I apologize for the delay in getting this to you. It has been a busy and difficult couple weeks keeping up with work and family commitments. I appreciate your patience.

Regards,

Nick

Good morning Nick,

Have you had a chance to start the list of RR bridges and associated data?

Note below, Concord to Lebanon RR line of interest to start.

Thanks

All the state owned bridges is of primary importance. If there are other bridges over the rail line that are not state owned, but exist it would be helpful to at least understand how many exist and how owns (or is responsible for) them.

Chuck has been working on this with Nick Goulas for state owned lines as previously requested. This bridge is over the line in Westboro Yard. The rest of the line which snakes through VT and touches NH in Walpole and Claremont and maybe a couple of other locations is owned by NECR. Do you want those bridges if any as well?

Patrick,

In order to better understand the need for the additional vertical clearance, I would like a summary of all the other bridges over this rail line with the bridge location, bridge type, year built, condition, and existing vertical clearance. Thanks,

Best Regards,

Bill & Patrick,

I have asked Kevin Russell to bring this project to a front office meeting to review the current status of the project and get additional direction on issues involving the RR clearance. I have attached a recent memo from Chuck Corliss which provides additional information on RR clearance concerns.

My main concerns with the request is.....Is the request to complete an engineering review of a 3' undercut reasonable given the close proximity of the rail yard?

We already have substantial sight distance concerns on the top side from the access drive (looking east toward the intersection) with the proposed 19' vertical clearance.

Pete

Good morning.

Please reach out to the City of Lebanon and their engineers DuBois & King to let them know I would like to further confirm the bridge footing elevation placement with my administration. Whether the 1 ft as discussed yesterday or the 3 ft would be the final recommendation from Rail & Transit.

Let me know when you get in, I'll swing by to discuss.

thanks
